YOUR STREAKS — v4 UPDATE

Two streaks are now tracked separately.

■ Form Streak

Counts consecutive days you submitted the daily check-in form. Visible on the leaderboard next to your name.

✗ Miss one form day — streak resets to zero.

— ■ Work Streak

Counts consecutive days you earned task-quality points — Standard (+5), Good (+10), Impressive (+15), or Extraordinary (+20). Posting work in WhatsApp counts, even without the form.

✗ Miss a day with no scored work — streak resets to zero.

THE RULE: Submitting the form always counts as work done — every form streak day is also a work streak day. But work alone does not give you a form streak. You must submit the form to keep the form streak alive.

DID NOT SUBMIT (DNS)

Members with no activity appear quietly at the bottom of the leaderboard.

If you did Figma work but missed the form, your work streak still counts — but your form streak resets.

There is always tomorrow.

BASE MAXIMUM POINTS

660 is the floor — not the ceiling.

Every point above 660 makes your certificate stronger.

Members who reach 1,000+ prove they outwork the requirement.

No resume can fake that.

You now know exactly how every point and every streak works.
The members who act on this every single day will finish far ahead.

Go earn them.
